

11-100 | Mobile tool suspension. C30/C40 track

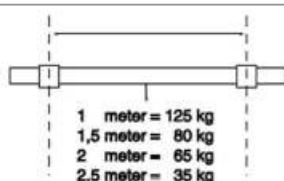

Suspending tools on moving track systems is a common way to reduce strain injuries and accident risks. Our C-tracks offer many possible solutions. Design your own system from the components or contact a CIBES sales representative for assistance. The load determines whether C30 or C40 track is required.

Overhead tracks (straight or curved)

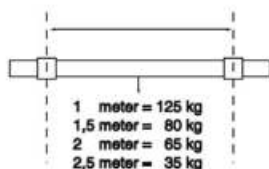

System:	C30
Components, data sheet:	11-102
Trolleys, data sheet:	11-106

System:	C40
Components, data sheet:	11-122
Trolleys, data sheet:	11-126

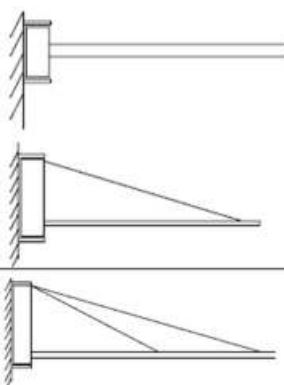

Mini bridge systems

System:	C40
Components, data sheet:	11-122
Trolleys, data sheet:	11-126

Wall-mounted jib arms

System:	C30
Standard base units, data sheet:	11-110
Trolleys, data sheet:	11-106

System:	C40
Standard base units, data sheet:	11-132
Trolleys, data sheet:	11-126
